Frensh  
Arabic

## EXPERIENCE

### RAMDIZZA PIZZASTORE APP

React / Redux / Tailwind

- Loaded from an API to keep the menu fresh and up-to-date.
- No user account required. Simply enter your name and start ordering.
- POST request sends user and pizza data to the API
- Each order receives a unique ID for easy verification.

### SPLIT THE BILLS

React / CSS Modules

- The app features a user-friendly interface designed for ease of navigation and efficient bill splitting.
- Users can effortlessly add and manage friends, each with their own profile and balance tracking.
- The app provides real-time balance updates, allowing users to instantly see who owes whom and how much.
- Users can input bill amounts and specify who paid and who owes, with the app automatically calculating the equitable distribution of expenses.
